

I am a resident of a nursing home in Plymouth WI. Ever since signing up with state of WI, about not wanting to receive any phone calls from people selling stuff. The state of WI has been doing a wonderful job and I don't think that the federal government should get involved. If something works my theory is "if it works why fix it". I'm sure you could look into some of the other things such as what is on TV. So much of the programming is almost pornographic. Thank you for reading my comments.
